

MATERIAL SPECIFICATION

Applicable to PN-4821 Mounting Bracket Assembly

MS-APX-2024-008 Rev A

1. MATERIAL REQUIREMENTS

The mounting bracket assembly (PN-4821) shall be manufactured from aluminum alloy **6061-T4** per AMS 4027. Material shall be in the solution heat treated condition. All raw material shall be sourced from DFARS-compliant domestic mills.

2. MECHANICAL PROPERTIES

Property	Requirement
Ultimate Tensile Strength	30.0 ksi minimum
Yield Strength (0.2%)	16.0 ksi minimum
Elongation (2 in.)	16% minimum
Brinell Hardness	65 HB typical

3. SURFACE TREATMENT

After machining, parts shall be anodized per MIL-A-8625 Type II, Class 1 (clear). Minimum coating thickness: 0.0002 inches.

4. QUALITY

Certificate of Conformance and mill test report required. Material shall be traceable to original heat lot.

Approved: D. Chang, Materials Engineering | Date: Sept 20, 2024
